

DISCOVER HET ANKER

MORE THAN 90 YEARS OF HISTORY

Welcome to Het Anker, where we create furniture with a unique look and of high quality. Since 1928, Het Anker has left an indelible impression in the furniture industry as a leading furniture manufacturer from the Netherlands. The company has established its name as a producer of high-quality leather and fabric furniture, known for its unique designs and exceptional quality. With an extensive collection of seating, Het Anker offers customized solutions for any living space. Taking pride in its craftsmanship, Het Anker remains committed to designing, manufacturing and distributing furniture of unparalleled quality, both nationally and internationally.

Our passion for design and innovation has led to the development of three distinctive brands: Anker Studio, Anker One and Anker Projects.

Anker Studio offers a contemporary collection of furniture and accessories designed by our own in-house designers. The Anker Studio collection has its own unique style and offers a wonderful mix of colours and materials. Each piece is designed with attention for detail and craftsmanship, resulting in a timeless design with a slight retro touch.

Anker One is our sustainable line of furniture made entirely from recycled materials. By using sustainable materials and manufacturing processes, we reduce our impact on the environment and contribute to a better future. Therefore, Anker One is the perfect choice for those looking to purchase stylish and sustainable furniture.

Anker Projects is our project-oriented division that focuses on custom-made furniture for the hospitality and (home-)office market. Whether it's a trendy café or a luxury hotel, Anker Projects has the knowledge and experience to create unique and stylish furnishings that perfectly fit the customer's needs.

At Het Anker, customer satisfaction comes first. Therefore, we offer excellent service and are always ready to advise and help you to make the right choice. Explore our collections and be inspired by the unique styles of Anker Studio, Anker One and Anker Projects.
